INDEX TO VOLUME XX

The asterisk * preceding the page number indicates an original article in this Journal. The letter B preceding the page number indicates a book review. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

Adams, R. D., see Webster, H., DeF., *5
Allergic encephalomyelitis of the guinea pig, *185
Alpha particle radiation, effects on rat brain, *459
Alvord, E. C., see Dennis, J. P., *412
American association of neuropathologists, annual meeting, of, Atlantic City, N. J., *279
Anderson, G. W., see Clark, D. B., *275
Anderson, W. R., and F. S. Vogel, encephalomyelitis induced in pigeons with homologous neural tissue and adjuvants, *548
Appel, S. H., see Bornstein, M. B., *141
Application of tissue culture to the study of experimental "allergic" encephalomyelitis. I. patterns of demyelination, *141
Aronson, S. M., see Okazaki, H., *237
Ascenzi, A., relationship between prefrontal lobe and thymus. report of an unusual case, *119
Astrocytes, Cajal gold-sublimate stain, a modification for paraffin sections for, *602
Åström, K. E., E. Bell, H. T. Ballantine, Jr. and E. Heidensleben, an experimental neuropathological study of the effects of high-frequency focused ultrasound on the brain of the cat, *484
Atrophy, cortical, widespread and spongy degeneration in the white matter and basal ganglia, *427
—, nodular cortical, intrinsic vascular changes in, *521
Autonomic ganglia, morphological and histochemical studies, on the, of scorbutic guinea pigs, *440

Bailey, O. T., presidential address, the vascular component of congenital malformations, *170
—, presentation of awards post-humously to J. H. Globus and G. B. Hassin, *1
—, presentation of award to Mrs. J. H Globus, *3
Ballantine, H. T., Jr., see Åström, K. E., *484
Banker, B. Q., cerebral vascular disease in infancy and childhood, I. occlusive vascular diseases, *127
Bedwell, S. F., and R. Lindenberg, a hypothalamic hamartoma with dendritic proliferation and other neuronal changes associated with "blastomatoid" reaction of astrocytes, *219
Bell, E., see Åström, K. E., *484
Bilirubin, experimental study of the toxicity of, in new born animals, *193
Bleeding, massive intracerebral, small vascular malformations as a cause of, *161
Blood, major components of, clearance following simulated subarachnoid hemorrhage, *450
Blood-nerve barrier in the rabbit, *35
Book reviews, B320, B456, B605
Bornstein, M. B., and S. H. Appel, the application of tissue culture to the study of experimental "allergic" encephalomyelitis, I. patterns of demyelination, *141
Brains of neonates, lesions, correlated with complications of labor, *275
Brownson, R. H., changes induced in the rat central nervous system following cumulative exposure to x-irradiation, a short term study, *206

Cajal gold-sublimate stain for astrocytes, modification for paraffin sections, *602
Calcification, intracerebral and subependymal ossification, *412
Cammermeyer, J., frequency of meningoencephalitis and hydrocephalus in dogs, *386
Carcinoma, combined with encephalopathy and neuropathy, *535
Cat brain, experimental neuropathological study of the effects of high-frequency focused ultrasound on, *484
Cerebral vascular disease in infancy and childhood. I. occlusive vascular diseases, *127
Clark, D. B., and G. W. Anderson, correlation of complications of labor with lesions in the brains of neonates, *275
Clearance of major components of whole blood from cerebrospinal fluid following simulated subarachnoid hemorrhage, *450
Congenital malformations, the vascular component of, *170
— subcortical encephalopathies in lambs, *554
Cordy, D. R., and G. Shultz, congenital subcortical encephalopathies in lambs, *554
Cortico-striatal degeneration of the Creutzfeldt-Jakob type, *105
Cravioto, H., see Silberman, J., *105
—, see Feigin, I., *245
Creutzfeldt-Jakob type, cortico-striatal degeneration of, *105

Courville, C. B., intrinsic vascular changes in nodular cortical atrophy. a comparison with similar lesions of later life resulting from ischemia, *521

Davis, R. L., and E. Nelson, unilateral ganglioglioma in a tubero-sclerotic brain, *571
Degeneration, cortico-striatal of the Creutzfeldt-Jakob type, *105
—, spongy and widespread cortical atrophy in the white matter and basal ganglia, *412
Dementia, progressive and quadriparesis in flexion, diffuse intracytoplasmic inclusions, associated with, *237
Demyelination, experimental in guinea pigs sciatic nerves during experimental diphtheritic neuritis, *5
—, patterns of, in experimental "allergic" encephalomyelitis, *141
Dendritic proliferation and other neuronal changes in hypothalamic hamartoma, *219
Dennis, J. P., and E. C. Alvord, Jr., microcephaly with intracerebral calcification and subependymal ossification: radiologic and clinico-pathologic correlation, *412
Diphtheritic neuritis in guinea pig sciatic nerve, experimental, *5
—, polyneuritis, experimental, in the rabbit and guinea pig, *35
Dupont, J. R., C. A. van Wart, and L. Kraintz, the clearance of major components of whole blood from cerebrospinal fluid following simulated subarachnoid hemorrhage, *450
Dysgénésie nodulaire disséminée of Morel and Wildi, *399
Dysplasia, verrucose of the cerebral cortex, *399

Editorial, *169
Encephalitis, masked, in familial hypogamma-globulinaemia, *380
Encephalomyelitis, experimental "allergic" application of tissue culture to the study of, *141
—, allergic of the guinea pig, liver necrosis in experimental, *185
—, induced in pigeons with homologous neural tissue and adjuvants, *548
Encephalopathies, congenital, subcortical in lambs, *554
Encephalopathy, progressive degenerative, *427
— and neuropathy combined with carcinoma, *535

Familial hypogamma-globulinaemia, *380
Feigin, I., and H. Cravioto, a histochemical study of myelin. a difference in the solubility of the glycolipid components in the central and peripheral nervous systems, *245
—, see Silberman, J. *105
—, see Naoumenko, J., *602
Ferraro, A., editorial *169
Field, E. J., liver necrosis in experimental allergic encephalomyelitis of the guinea pig, *185
Fisher, C. M., W. E. Karnes, and C. S. Kubik, lateral medullary infarction—the pattern of vascular occlusion, *323
—, H. W. Williams, and E. S. Wing, Jr., combined encephalopathy and neuropathy with carcinoma, *535

Ganglioglioma, unilateral, in a tubero-sclerotic brain, *571
Ganglionic inclusions, intracytoplasmic, *237
Gliomas, silvercarbonate method for impregnation of, * 593
Globulinaemia, hypogamma, familial, *380
Globus, Mrs. J. H., acceptance of award for J. H. Globus, *3
—, acceptance of award, *4
Glycogen studies in rat brain, effects of alpha particle radiation, *459
Glycolipid components in the central and peripheral nervous systems, difference in solubility, *245
Grcevic, N., and F. Robert, verrucose dysplasia of the cerebral cortex (dysgénésie nodulaire disséminée of Morel and Wildi), *399

Hamel, E. G., see Kaelber, W. W., *263
Harman, P. J., see Tassoni, J. P., *158
Hamartoma, hypothalamic, *219
Haymaker, W., see Klatzo, I., *459
Heidensleben, E., see Åström, K. E., *484
Hörsdal, O., see Löken, A. C., *427
Hydrocephalus and meningoencephalitis, in dogs, frequency of, *386
Hypothalamic hamartoma, *219

Inclusions, intracytoplasmic (Lewy type), *237
Infarction, lateral medullary, *323

Jakob-Creutzfeldt disease, clinicopathological analysis, *78
—, analysis of some constituents of the brain, *95

Kaelber, W. W., and E. G. Hamel, observations on rest-type tremor in the cat, *263
Kagan, E. H., see Katzman, R., *78
Karnes, W. E., see Fisher, C. M., *323
Katzman, R., E. H. Kagan, and H. M. Zimmerman, a case of Jakob-Creutzfeldt disease, 1. a clinicopathological analysis, *78
—, see Korey, S. R., *95
Kenny, G. C. T., the "nervus conarii" of the monkey (an experimental study), *563

Kepes, J., observations on the formation of psammoma bodies and pseudopsammoma bodies in meningiomas, *255
Klatzo, I., J. Miquel, and W. Haymaker, effects of alpha particle radiation on the rat brain, including vascular permeability and glycogen studies, *459
Korey, S. R., R. Katzman, and J. Orloff, a case of Jakob-Creutzfeldt disease, 2. analysis of some constituents of the brain of a patient with Jakob-Creutzfeldt disease, *95
Kraintz, L., see Dupont, J. R., *450
Kubik, C. S., see Fisher, C. M., *323

Labor, complications of, correlation with lesions in the brains of neonates, *275
Lambs, congenital subcortical encephalopathies in, *554
Lateral medullary infarction, *323
Lindenberg, R., see Bedwell, S. F., *219
Lipkin, L. E., see Okazaki, H., *237
Liss, L., the oligodendrogliomas. a comparative study with tissue culture and silver-carbonate techniques, *582
Liver necrosis in experimental allergic encephalomyelitis of the guinea pig, *185
Löken, A. C., and O Hörsdal, progressive degenerative encephalopathy of unusual type. a clinico-pathological study of a case characterized by widespread cortical atrophy and by spongy degeneration in the white matter and basal ganglia, *427

Malformations, vascular, as a cause of massive intracerebral bleeding, *161
Margolis, G., G. L. Odom, and B. Woodhall, further experiences with small vascular malformations as a cause of massive intracerebral bleeding, *161
Medullary infarction, lateral, *323
Meningiomas, observations on the formation of psammoma bodies in, *255
Meningoencephalitis and hydrocephalus, in dogs, frequency of, *386
Microcephaly with intracerebral calcification and subependymal ossification, *412
Miquel, J., see Klatzo, I., *454
Morphological and histochemical studies on the autonomic ganglia of scorbutic guinea pigs, *440
Muscular dystrophy, succinic dehydrogenase activity at different stages of, in the mouse, *158
Myelin, a histochemical study of, *245

Naoumenko, J., and I. Feigin, a modification for paraffin sections of the Cajal gold-sublimate stain for astrocytes, *602
Nelson, E., see Davis, R. L., *571
Neonates, correlation of complications of labor with lesions in the brains of, *275
Nervus conarii of the monkey (an experimental study), *563
Neuritis, diphtheritic, experimental of sciatic nerves in guinea pigs, *5
Neuropathy and encephalopathy combined with carcinoma, *535
Nodular cortical atrophy, intrinsic vascular changes in, *521

Occlusion, vascular, the pattern of, *323
Odom, G. L., see Margolis, G., *161
Okazaki, H., L. E. Lipkin, and S. M. Aronson, diffuse intracytoplasmic ganglionic inclusions (Lewy type) associated with progressive dementia and quadriparesis in flexion, *237
Oldberg, E., acceptance of award for G. Hassin, *2
Oligodendrogliomas, a comparative study with tissue culture and silver-carbonate techniques, *582
Olszewski, J., see Rozdilsky, B., *193
Orloff, J., see Korey, S. R., *95
Ossification, subependymal and intracerebral calcification, *412

Phase and electron microscopic studies of experimental demyelination. II. Schwann cell changes in guinea pig sciatic nerves during experimental diphtheritic neuritis, *5
Pigeons, encephalomyelitis induced in, *548
Polyneuritis, diphtheritic, experimental study in the rabbit and guinea pig, *35
Polio-encephalopathy or masked encephalitis in familial hypogammaglobulinaemia, *380
Presidental address, *170
Prefrontal lobe and thymus, relationship between, *119
Progressive degenerative encephalopathy of unusual type. a clinicopathological study of a case characterized by widespread cortical atrophy and by spongy degeneration in the white matter and basal ganglia, *427
Psammoma bodies and pseudopsammoma bodies in meningiomas, observations on the formation of, *255

Quadriparesis in flexion and progressive dementia associated with diffuse intracytoplasmic ganglionic inclusions, *237

Radiation, alpha particle, effect on rat brain, *459
Relationship between prefrontal lobes and thymus, *119
Robert, F., see Greevic, N., *399
Rozdilsky, B., and J. Olszewski, experimental study of the toxicity of bilirubin in newborn animals, *193
